

## New eSped Contract for Region XI Districts

ESC Region XI and eSped have partnered to provide a new level of service to school districts' management of special education data. Region XI schools may now purchase eSped special education management software through the TETPC purchasing cooperative.

A pioneer in Web-based student data management solutions, eSped provides state-specific application services for school districts all over the country. Its Web-based applications for planning, documenting, and administering education programs allow you to spend more quality time teaching and aiding in the process of student learning.

Districts can save time and effort by using ESC Region XI's contract with eSped, without the need to solicit RFPs. In addition to the convenience, ESC Region XI has negotiated, through competitive bid, the most aggressive pricing in the state. Current Region XI users can take advantage of the following prices:

Region XI Districts — \$24 per special needs student.  
Non-Region XI Districts — \$30 per special needs student

*Pricing guaranteed through August 31, 2013.*
